Latest News

NHBC Accepts

We're delighted to announce that our offsite structural Dormers are now officially on the NHBC Accepts list, meaning they are accepted for use on developments covered by the NHBC Buildmark Warranty.

NHBC Accepts is a comprehensive review service for innovative systems. Is it the fast-track route for acceptance of build systems for use in homes covered by all NHBC warranty and insurance policies, equivalent to around 70-80% of the new homes build in the UK each year.

The NHBC Accepts accreditation gives additional peace of mind, including:

- Building confidence
- Procurement reassurance
- Continuous improvement
- Investible and tradable assets

DORMERS

Curved Trusses

We understand timber and how timber engineered products can save our clients time and money and we relish the challenge of complex and unusual demands.

We recently completed a curved truss design and manufacture project to match an adjacent barn roof.

G4C Awards 2023

Congratulations to Joshua Perry who has been shortlisted for the G4C - New Professional of the Year award!

The awards are a celebration of Young Achievers in Construction and the companies who support and train the future leaders of the industry.

Joshua joined Timber Innovations in 2017. David Himmons, Director of Timber Innovations adds "it's great to see Joshua receive this recognition from G4C and its testament to his development both personally and professionally."
