

Fire Tested Range

Building safely and responsibly is our mission at WB Timber Innovations.

We have developed a range of wall panels which have been independently fire tested to EN1365 that incorporate responsibly sourced, recycled or naturally sustainable materials. This is part of our journey to be carbon neutral without compromise to safety and comfort standards.

Larsen Twin Stud

Fill Material	Fire Resistance
Recycled Glass Wool	REI 90
Cellulose	REI 60

Single Stud Range

Fill Material	Fire Resistance
Woodfibre	REI 60
Mineral Wool	REI 60

- U-values from Building Regs to Passiv standards
- Passiv standards - Air tightness
- Full test data available upon request
